

Please do NOT allow cell phone use on aircraft. There is enough stress flying with children people that argue with the aircraft staff. Many cell phone users have no manners and I know that many confrontations will occur with some of the more obnoxious users. As a frequent flyer I have endured many loud people taking on the cell phone in the airport waiting areas. At least there, I can get up and move. In an airplane there is no escape, except to start singing if a cell phone user continues to talk loudly. People on their cell phons will have to talk loudly to talk over the noise of the engines.
